

RTOERO FOUNDATION

Canada's population is aging — and with the population shift, comes new challenges. We invest in research, ideas and actions to build a better and healthier future for all of us as we age.

The foundation was established in 2011 by RTOERO members with the goal to raise and invest funds in research and programs that benefit Canada's aging population.

As the health and well being of older adults in Canada is a priority for RTOERO members, the work of the foundation aligns with our focus on aging well, maintaining social connection, giving back, and advocacy.
